

SHIPPING CENTER LITE FACTSHEET

INCREASE EFFICIENCY WITH SHIPPING CENTER LITE

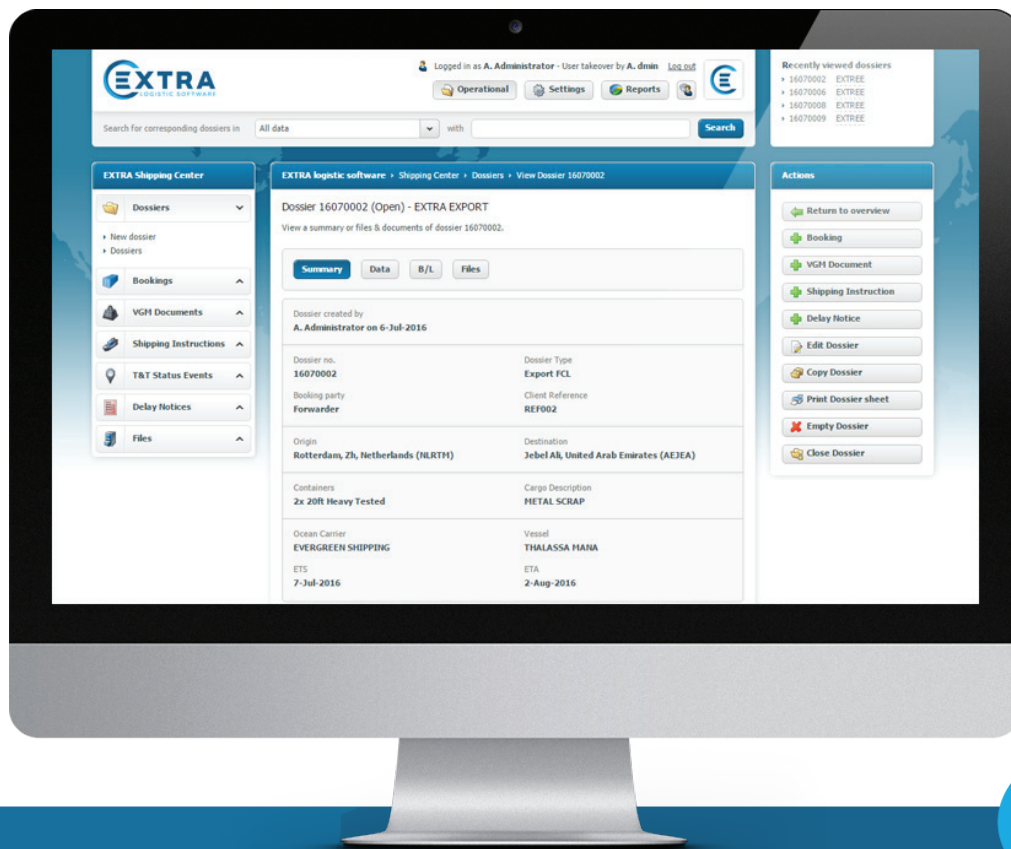

Shipping Center Lite connects shippers, forwarders and ocean carriers in one online solution.

✓ USER FRIENDLY

✓ INNOVATIVE

✓ TRANSPARENT

✓ CUSTOMIZABLE

SHIPPING CENTER IS ONLINE

Available anywhere in the cloud

DESIGNED AND TAILORED FOR YOUR ORGANISATION

Shipping Center Lite is innovative designed and build from the shipper and forwarders perspective. Because Shipping Center is made in a user friendly environment and will also support/enforce local processes and methodologies it's easily adoptable and connectable via EDI in every shipper and/or forwarders organization.

MODULES

For clear workflows the Shipping Center Lite modules are divided in 2 parts:

OPERATIONAL

From Booking to Shipping Instruction, connected to your suppliers.

REPORTS

Generate operational reports to make the most of your company.

OPERATIONAL

DOSSIERS, FOR YOU AND YOUR CLIENTS

Create a dossier for your client and all the data will be saved. The dossier will be built up with all the data from created entities like booking, VGM filing, shipping instruction, etc. Besides that you can enrich a dossier with files and documents. You're able to give access to your clients with an account to dossiers in order to stay fully updated.

With different statuses and and extra functions like Track & Trace Status Events, the dossier module is the starting point of all your daily processes.

OPERATIONAL

BOOKINGS, DIRECTLY CONNECTED TO OCEAN CARRIERS

Book all your FCL-shipments directly from more than 30 ocean carriers in the world thanks to our connection with INTTRA. Our connection works from both sides; besides sending your booking you will also receive the digital booking confirmation. The use of statuses and e-mail notifications makes this process clear, fast and user friendly. Also your LCL-shipments can be sent via a standardized e-mail format.

OPERATIONAL

VGM FILING

Send a PDF with your VGM filing according to the SOLAS specifications to the carrier. Due to our connection with INTTRA you're also able to send your VGM filing via EDI to connected carriers.

OPERATIONAL

SHIPPING INSTRUCTIONS, DIRECTLY CONNECTED TO OCEAN CARRIERS

You can send your FCL Shipping Instructions directly to more than 30 ocean carriers in the world thanks to our connection with INTTRA. You will receive a discount on your Bill of Lading charges for most of the ocean carriers. You can confirm your Shipping Instructions by uploading the Draft B/L. The use of existing dossier data, statuses and e-mail notifications makes this process clear, fast and user friendly.

Also your LCL shipments can be sent via a standardized e-mail format.

OPERATIONAL

TRACK & TRACE STATUS EVENTS

Via our INTTRA connection Shipping Center receives Status Events of your shipments of more than 30 carriers. A history is kept of Status Events per container. By the use of a checklist you're notified of possible ETS and/or ETA changes. You're in control of the actions, sending a Delay Notice for example.

OPERATIONAL

DELAY NOTICES, NOTIFY YOUR CLIENT DIRECTLY

Did you only receive a change in the ETS and/or ETA? Directly send a standardized e-mail format with the Delay Notice in PDF.

RAPPORTAGES

Generate several operational and sales reports with the option to export to Excel. For example you can generate a report of B/Ls, container volume, ETS/ETA overview, etc.

We constantly work on new report types. Are you missing a report type and would you like to have it? We would like to add this report for you in Shipping Center Lite.

EXTRA FEATURES, NICE TO HAVE!

Besides the different modules of Shipping Center Lite we have also included loads of extra features. Some examples of these extra feature are mentioned below:

- + Shortcut to last viewed dossiers
- + Advanced search options
- + Address book for Shipper, Consignee and more
- + Address book for Terminals and CFS's
- + Automatic e-mail notifications to your clients
- + Automatic status updates
- + Feedback, to request changes
- + User management, being able to manage rights of all employee accounts
- + Admin options to manage container types, package types, cargo types and geolocations from over the world
- + Client login with restricted access to dossiers.
- + Designed in your own corporate identity

BENEFITS

Accessible; fully online anywhere in the world on PC, Mac, tablet and smartphone

User friendly; clear workflows with suggestions and validation

Fast; all data is saved and can be reused in every module, only enter data once

Uniform; all of your documentation and e-mails from Shipping Center Lite in one style

Flexible; Shipping Center Lite can be completely tailored to your wishes

COMPLETELY TAILOR MADE FOR YOUR COMPANY

Because each company is different we believe that our logistical software should be able to be tailored for each separate company. Only in this setup the software complies with every procedure and methodology. Based upon the demo of Shipping Center Lite and an intake we can decide together how to optimize Shipping Center Lite to your needs.

ABOUT EXTRA LOGISTIC SOFTWARE

EXTRA logistic software is founded in 2012 out of passion, experience and knowledge of the shipping industry, UX design and the latest web technologies. This combination is the solution for the development of user friendly, fast and innovative web applications. Do you want to have these advantages for your own company?
